

Proposition 39 Pilot Workshops

Lessons from ZNE School Retrofits

Brought to you by California's Investor-Owned Utilities

A zero net energy (ZNE) building generates as much energy as it consumes annually. Each year our schools spend more than \$6 billion on energy. This is second only to salaries and more than textbooks and computers combined!* ZNE saves energy and puts money back into classrooms.

Join one of our 2017 no-cost workshops to learn how existing K-12 school and community college buildings in California are being transformed to zero net energy (ZNE) performance.

More than 10 new pilot projects are currently underway through a unique investor-owned utility pilot program called the Proposition 39 ZNE Schools Pilot Program. These real-world examples offer critical insight into the costs, design and construction approaches, and operational needs to successfully achieve ZNE in schools through whole building retrofits. These interactive workshops will feature the experiences of school officials and design teams working on these groundbreaking projects to help share the lessons learned and expand knowledge of the opportunities and challenges to ZNE school retrofit design and operations.

Who should attend: school administrators, construction and operations managers, business office staff, community stakeholders, architects, engineers, contractors, and others interested in ZNE are encouraged to attend. Space is limited, so please register and reserve your spot today at: newbuildings.org/proposition-39-pilot-workshops/.

A TECHNICAL DEEP DIVE INTO ZNE SCHOOL RETROFITS

Attendees will advance their knowledge of the design process, technology application and approaches used in the Proposition 39 ZNE Schools Pilot Program during this four-hour interactive workshop.

8:00 am-12:00 pm May 25, San José
Environmental Innovation Center

An additional Fall 2017 date for this session to be announced soon.

THE BUSINESS OF ZNE SCHOOL RETROFITS AND COMMUNITY IMPACT

This three-hour session focuses on the business of creating ZNE school retrofit projects and will highlight the experiences of districts participating in the Proposition 39 ZNE Schools Pilot program.

Fall 2017 dates for this session to be announced soon.
