

ZERO NET ENERGY SCHOOL RETROFIT TRAININGS

2018 Proposition 39 Pilot Training Series Brought to you by California's Investor-Owned Utilities

Bishop O'Dowd Center for Environmental Studies | Oakland, CA Photo Credit: David Wakely

Join one of our no-cost training events to learn how existing K-12 school and community college buildings in California are being transformed to zero net energy (ZNE) performance. New training topics for 2018!

WEBINARS **Mission Possible! Southern California Prop 39 ZNE School Retrofit Pilot Case Studies**
September 27, 11 a.m. -12 p.m.

Perspectives on the Cost of ZNE Retrofits
November 29, 11 a.m. -12 p.m.

WORKSHOP **Inefficiency is Old School: A Technical Deep Dive Into ZNE School Retrofits**
October 30, 1:00-5:00 p.m.
Pasadena, Green California Schools & Community College Summit and Exposition

One in-person workshop and two on-line webinars in Fall 2018 will highlight the benefits of high performance schools and approaches to achieve ZNE in new and existing schools.

Trainings will use real-world examples, including those currently underway in the Proposition 39 ZNE pilot program, to offer critical insight into the costs, design and construction approaches, operational needs, and lessons learned to successfully achieve ZNE in schools through whole building retrofits.

Who should attend: school administrators, construction and operations managers, business officials, community stakeholders, designers, contractors, and others interested in high performance design and construction are encouraged to attend.

Full descriptions of the sessions listed, as well as registration links, are available on the website at: newbuildings.org/proposition-39-trainings
