## Discussion Questions

### APPLICATIONS

- How does climate factor in?
- What role do refrigerants play in this decision?

### DESIGN

- How do you size products for different applications?
- What design configurations can impact System COP?

### DELIVERY

- What is typical time from order placed to delivery to site?
- What is your approach to delivery – skid? fully specified? custom?

### COST & PERFORMANCE

- What is the upfront cost compared to a gas system?
- What training is available for maintenance & operations staff?

Thank you!

## FULLY SUPPORTED SOLUTION FROM SIZING TO START UP

- Ecosizer System Sizing
- "Drop In" Design
- Factory Assembled Skids
- Semi Assembled Droplets
- Full System Pricing
- Bidder & Installer Training
- Factory Startup Service
- Warranty on Factory Skids
